To Whom It May Concern,

Subject: Confirming the Provision of Biosafety and Biosecurity Training by Technivention Lifecare Private Limited

The United Nations Office for Project Services (UNOPS) , Horn of Africa Multi-Country Office confirms that we have contracted Technivention to provide the Biosafety and Biosecurity training delivered to Ethiopian delegates from the Ministry of Health.

The training, conducted by Technivention Lifecare Private Limited, was delivered in a hybrid format—virtually from September 15 to 19, 2025, followed by hands-on sessions and facility visits from September 22 to 26, 2025 in Mumbai, India. Based on the pre and post-course surveys completed by the participants, the training significantly enhanced their theoretical understanding and practical competencies in biosafety and biosecurity. We appreciate Technivention for their commitment to the successful delivery of the training. We look forward to future collaborations in this vital area.

Sincerely,

Irene Kavene Muange
